

When operational control
meets consumer protection.

PIONEERING DIAGNOSTICS

Protect your reputation. Protect your consumers.

To reduce the presence of pathogens, poultry establishments must implement and monitor food safety hazard analysis at every stage of processing. And with the rise of antibiotic-resistant bacteria, it's equally critical to track and understand microbial resistance trends at the farm level to protect both your flock and your consumers. bioMérieux testing solutions offer a rapid, streamlined workflow that maximizes your profitability – and most importantly, delivers information you can count on.

TAKE CONTROL OF YOUR HACCP PROGRAM.

Monitoring the performance of your Hazard Analysis Critical Control Points (HACCP) system—while keeping productivity levels high—requires accurate, precise, automated, and traceable microbial testing methods. Getting those test results quickly enables faster corrective actions.

ACCURATE

- Ensure product safety
- Identify issues efficiently
- Provide evidence of control

RAPID

- Pinpoint production problems
- Take corrective actions sooner
- Reduce time to market

STREAMLINED

- Increase productivity
- Ensure data traceability
- Eliminate error potential

PROTECT YOUR PROFITS WITH FASTER DECISIONS.

Our streamlined solutions allow you to monitor and take quick corrective actions along the entire production chain – from farm-level to finished product. Releasing your product onto shelves in less time lowers logistical costs and allows you to meet your final customers' requirements.

UNLOCK VALUE WITH A STREAMLINED WORKFLOW.

Pathogen reduction control testing takes time, labor, and training. Minimizing all three of these without compromising accuracy can lead to significant savings. That's why all our testing solutions have simplified workflows and intuitive interfaces which increase productivity. With bioMérieux's internationally validated solutions, you'll reap the benefits almost immediately for either local or international distribution.

STAY IN COMPLIANCE WITH TRACEABLE DATA.

With an intuitive, simplified workflow to protect sample integrity and built-in data management traceability to keep your data within compliance standards, bioMérieux testing solutions are all LIMS-compatible to ensure your results are easy to access at a moment's notice.

CUSTOMIZED SOLUTIONS FROM THE LEADER IN FOOD SAFETY.

Every lab and plant is different. Our team of microbiology experts specialize in customizing solutions to meet your facility's unique needs, and providing the support you need to make sure your quality-control solutions are keeping your business at its best.

GET THE RIGHT SOLUTION FOR YOUR LAB.
